Re: Tyson's Dump Site
September 1984 Progress Report
NUS Subcontract No. Z0830907

Dear Mr. Wojcik:

Enclosed is the September, 1984 Progress Report for the Tyson's Dump Site Superfund project. No significant project developments occurred during September as we have submitted the RI and FS draft reports and are awaiting EPA's decision on the selection of a preferred alternative prior to initiating the conceptual design phase of the project.

If you have any questions concerning the enclosed report, please contact me.

Very truly yours,

BAKER/TSA DIVISION

WORK ASSIGNMENT STATUS REPORT
EPA CONTRACT NO. 68-01-6699, MOD. NOS. 43 AND 50
WORK ASSIGNMENT NO. 51-3L56
TYSON'S DUMP SITE
MONTGOMERY COUNTY, PENNSYLVANIA
NUS PROJECT NO. S770 (0770)

Activity: Remedial Investigation/Feasibility Study

1. Progress this Period - September 1984:

The draft Feasibility Study was submitted to EPA in early September. EPA requested that 14 slides be prepared for the public meeting presentation, scheduled for October 10. Submission of these slides will occur in early October. Ed Shoener, Region III CERCLA Enforcement, requested that all field records and CLP information contained in Baker/TSA files be sent to Tech Law Inc. in Fairfax, Virginia. These records were sent September 20.

2. Problems Resolved:

No problems were encountered during September.

3. Anticipated Problem Areas and Recommended Solutions:

Budgetary constraints will require that all future work requests be confined to the original scope of services. Adequate monies remain for the conceptual design and minor revision to previously submitted RI and FS reports as long as the EPA clearly defines the format of the product desired.

4. Deliverables Submitted:

Twenty (20) copies of the draft FS were submitted to EPA Region III on September 4. Single copies of the RI and FS draft reports were submitted to EPA Region V on September 24 at the request of Joe Dugandzic, EPA Project Officer.

5. Upcoming Events:

Meetings are tentatively scheduled with Conrail and Upper Merion Township officials on October 9 and 10. In addition, the public meeting to present the findings of the RI and FS is scheduled for October 10.

6. Activities Planned:

No major activities are anticipated until EPA selects the preferred alternative.

7. Key Personnel Changes: None

8. Subcontracting: None

9. Travel this Period: None
10. Contract Laboratory Program:

Baker/TSA received a revised data package from the Environmental Research Group, Inc. Apparently these data were generated in June, 1984, as a result of an investigation by the EPA Data Audit Team. Baker/TSA is reviewing these data to ascertain their significance to the project.

11. Schedule Changes: None

Remedial Investigation/Feasibility Study

1. Progress This Period - September/1984:

The draft Feasibility Study was submitted to EPA and NUS in early September. EPA requested that 14 slides be prepared for the public meeting presentation, scheduled for October 10. Submission of these slides will occur in early October. Ed Shoener, Region III CERCLA Enforcement, requested that all field records and CLP information contained in Baker/TSA files be sent to Tech Law Inc. in Fairfax, VA. These records were sent September 20.

2. Problems Resolved:

No problems were encountered during September.

3. Anticipated Problem Areas and Recommended Solutions:

Budgetary constraints will require that all future work requests be confined to the original scope of services. Adequate monies remain for the conceptual design and minor revision to previously submitted RI and FS reports as long as the EPA clearly defines the product desired.

4. Deliverables Submitted:

Twenty (20) copies of the draft FS were submitted to EPA Region III on September 4. Five copies of this report also were submitted to NUS on this date. Single copies of the RI and FS draft reports were submitted to EPA Region V on September 24 at the request of Joe Dugandzic, EPA Project Officer.

5. Upcoming Events:

Meetings are tentatively scheduled with Conrail and Upper Merion Township officials in early October. In addition, the public meeting to present the findings of the RI and FS is scheduled for October 10.

AR302291

6. Activities Planned:

No major activities are anticipated until EPA selects the preferred alternative.

7. Key Personnel Changes:

None.

8. Second Tier Subcontracting:

No subcontractors were utilized during September.

9. Travel This Period:

No travel occurred during September.

10. Contract Laboratory Program:

Baker/TSA received a revised data package from the Environmental Research Group, Inc. that had been misfiled by NUS. Apparently these data were generated in June, 1984, as a result of an investigation by the EPA Data Audit Team. Baker/TSA is reviewing these data to ascertain their significance to the project.

11. Schedule Changes:

None occurred or are anticipated.

12. Percent Complete - 90% (On Last Day of the Month).

13. Estimated expenditures this period - \$2,500.

Cumulative expenditures to date - \$232,500*.

Optional Form 60 (12/83) - \$264,143.

*Revised to reflect invoices submitted to date.
